

Sure would like to see the Honda PS250 come to the States. Another gas saving way of getting around, and we sure need that. The foot brake issue, should go away, this type of scooter with an automatic transmission and it's superior hand brakes, is far better than using the right foot to stop. Hands are much faster, and more dexterious than any feet would be! Lets get this scooter in our stores, pronto! Thank you. C H Barnes.
